PROFILE SUMMARY

Detail-oriented Data Analyst and Computer Science graduate with hands-on experience in data analysis, machine learning, and dashboard development in Python, SQL, and Power BI. Currently pursuing Data Science course from Bombay Stock Exchange (BSE) In-stitute• Experience in building financial web applications, analysing real-time market data, and designing AI-driven workflows for quantitative research and business decision making.

SKILLS

- **Technologies:** Python, SQL, Machine Learning, Predictive Modeling, LLM Prompting
- **Tools:** Power BI, Advanced Excel, MySQL, Tableau, Streamlit, Jupyter Notebooks
- **Soft Skills:** Analytical Thinking, Problem Solving, Data Storytelling, Data-Driven Decision Making
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, yfinance

EXPERIENCE

AI Agent Builder & Data Science Specialist

Remote

Outlier AI (via Upwork)

May 2026 – Present

- Selected for a high-value contract to evaluate AI agents and LLM-powered workflows for Outlier AI's agent training dataset.
- Designed, tested, and validated AI agent reasoning chains, prompt pipelines, and structured outputs to improve model alignment and response quality.
- Applied Python, data preprocessing, and ML knowledge to assess agent task performance, flag errors, and contribute high-quality labeled training data.

Data Science Intern

Remote

Jyesta Corporate Entity (NSDC Certified)

Aug 2025 – Oct 2025

- Completed a 2-month NSDC-certified Data Science internship, demonstrating commitment, perseverance, and professionalism in applied data science tasks.
- Worked on real-world data pipelines, model building, and analytical reporting.
- Strengthened quantitative analysis skills utilizing Python, Machine Learning, and structured data analysis techniques.

PROJECTS

FinWise India – Personal Finance Planning Dashboard | [FinWise](#)

- Built a full-stack Indian personal finance application featuring investor profiling and SIP compounding tables (1-20 years).
- Developed an asset planner utilizing the 20/4/10 rule, EMI checks, and integrated a live market strip for NIFTY 50, SENSEX, GOLD, and USD/INR.

Stock Analysis & ML Prediction App | [Stock-Analysis](#)

- Developed a Machine Learning dashboard utilizing Logistic Regression, Random Forest, and ensemble classifiers to predict NSE stock price direction.
- Integrated advanced quantitative financial metrics including Sharpe ratio, max drawdown, ATR-based stops, and ROC-AUC metrics.

Business Intelligence Dashboards | [Power BI](#)

- Engineered 3 end-to-end interactive dashboards analyzing Amazon Sales, Netflix Content, and Gym Memberships.
- Designed interactive visualizations using KPI cards, slicers, MoM growth metrics, and advanced DAX segmentation.
- Identified underperforming sales categories within an Amazon retail dataset, successfully pinpointing factors contributing to a 15% revenue gap.

EDUCATION

BSE Institute (Bombay Stock Exchange)

Data Science Program 2026

SIES College

Bachelor of Computer Science: CGPA: 6.94 2026

Karmaveer Bhaurao Patil College

Computer Science 12th HSC 53.83 2023

Modern School, Vashi

10th SSC 70.20 2021

CERTIFICATIONS & TRAINING

- Data Science Internship (NSDC Certified) – **Jyesta Corporate Entity**
- SQL for Data Science – **Great Learning Academy**
